

Scaling Kubernetes Pods in Minikube

Command to Scale

```
# kubectl - - scale deploy Huguette-dev - - replicas=10
```

Command to expose the service (SVC)

```
# kubectl - - expose deploy Huguette-dev - -  
type=NodePort
```

Command to access the link to expose the deployment on the internet

```
# kubectl service - -url Huguette-dev
```

Paste the url on the browser and you should be good to go.

Command to access minikube dashboard

```
# minikube dashboard
```
